

I oppose this change because Airl is the reason that myself and my family took out the CDs and went back to radio. As a resident of Tennessee, where country music is king, those of us that hate it don't have many alternatives. Airl is an alternative Christian music station out of California that plays music that is not heard anywhere else. I see a ton of Airl bumper stickers in this area which shows how Airl is meeting the need of the community. Please do not make this change and make us go back to CDs.

Thank you very much...Judson
